

# QUICSEAL 638

Product Name

## **Water-Based Impregnator (Back Treatment)**

### **Description**

QUICSEAL 638 is a water-based, water repellent impregnator that is suitable for only the bottom side of natural marbles.

### **Uses**

QUICSEAL 638 is suitable for application for most building materials such as terracotta, exposed bricks, cement and natural stones. However, for natural stones, it should only be applied for the bottom side.

### **Advantages**

- Dirt and water repellent.
- Protects and does not alter the appearance of the stone.
- Anti-mould, anti-efflorescence properties.

### **Application**

QUICSEAL 638 should be applied when surface is very dry and clean. The impregnator should be applied using a short-haired roller, flat brush or polished spreader. Curing time is 24 hours. Two coats may be required depending on porosity of materials, leaving three to four hours between each coat.

### **Accidental leakage and waste disposal method**

In case material is released or spilled, clean up the most of the product. Absorb all residues with sand, sawdust etc. Store the residue in plastic tank and call for a specialized company.

### **Packaging**

QUICSEAL 638 is supplied in 1 litre bottle, 5 litres pail and 25 litres pail.

### **Storage**

Keep the tin closed and store in a cool place.

### **Shelf life**

12 months

### **Coverage**

15 to 20m<sup>2</sup> per litre per coat for natural finished stones
