

QUICSEAL 638

Water-Based Impregnator (Back Treatment)

Description

QUICSEAL 638 is a water-based, water repellent impregnator that is suitable for only the bottom side of natural marbles.

Uses

QUICSEAL 638 is suitable for application for most building materials such as terracotta, exposed bricks, cement and natural stones. However, for natural stones, it should only be applied for the bottom side.

Advantages

- Dirt and water repellent.
- Protects and does not alter the appearance of the stone.
- Anti-mould, anti-efflorescence properties.

Application

QUICSEAL 638 should be applied when surface is very dry and clean. The impregnator should be applied using a short-haired roller, flat brush or polished spreader. Curing time is 24 hours. Two coats may be required depending on porosity of materials, leaving three to four hours between each coat.

Accidental leakage and waste disposal method

In case material is released or spilled, clean up the most of the product. Absorb all residues with sand, sawdust etc. Store the residue in plastic tank and call for a specialized company.

Coverage

15 to 20m² per litre per coat for natural finished stones

Packaging

QUICSEAL 638 is supplied in 1 litre bottle, 5 litres pail and 25 litres pail.

Storage

Keep the tin closed and store in a cool place.

Shelf life

12 months
